

what our customers say

"We've been a customer of stacked since last year and we find them a lot more cost effective as a supplier. Specifically, the stacked own brand toners are much cheaper but just as good as the originals. The quality guarantee and accreditations also influenced our decision to switch to this product. The toner quality is really good. I would definitely recommend this product."

Loretto O'Regan *Lisavaird Co-Op*

"We've been buying office and IT supplies from stacked for ten years. They offer a very good service and we have a really helpful sales account manager looking after us. We especially appreciate the next day service and the option of same day at a small cost if our order is needed immediately. We prefer stacked's own brand toners over the originals because they are much more cost effective and perform just as well as the originals. We have a lot of printers and it would be very expensive if we used the originals. We have found the quality of stacked's own brand toners to be equally as good as the original brands. I would definitely recommend trying them out."

Imelda Knight *Brodericks*

"We've been buying stacked own brand toners since June 2018. We initially switched because of the price difference but we've also been delighted by stacked's service; they communicate well and deliver on time. The quality of the toners is second to none, I'd definitely recommend switching."

John O'Gorman *Adhesives Research*

"We've been a customer of stacked since 2013. They are a preferred supplier for us due to price and also because of our account manager Rachel Price is brill at her job & so, so helpful! It's also really easy to order and we usually get our deliveries the next day! We prefer the stacked own brand toners for price mainly. Saying that though, the quality of toners are fine and they last just as long as the originals. I would definitely recommend trying them."

Tracy Grehan *KPW Print Management*

why use stacked branded toners?

All stacked ink and toner cartridges are fully guaranteed against any defects and are produced to match the OEM product in performance, print quality and page yield. All of our cartridges are manufactured to strict 9001 quality standards and also carry a 14001 environmental accreditation.

Stacked remanufactured toner cartridges are produced by recycling OEM toner cartridges, reducing waste plastic going to landfill.
